

PROFESSIONAL SPECIFICATION | INDICATIVE TECHNICAL DATA

Blue Calcite

Natural-stone reference selected by Marbre Import for architectural, interior and bespoke fabrication projects. Colour, veining and technical performance must be confirmed against the actual lot offered.

STONE FAMILY	Natural calcite / carbonate stone
MAIN COMPOSITION	Calcium carbonate (CaCO3)
APPEARANCE	Milky blue, blue-white and blue-grey movement, with occasional translucent areas
FORMATS AND FINISHES	Slabs, decorative panels and made-to-measure pieces; polished, honed and project-specific finishes
RECOMMENDED APPLICATIONS	Feature walls, niches, headboards, protected furniture, decorative objects and wellness interiors
EXTERIOR USE	Not recommended without project-specific assessment
BACKLIGHTING	Possible only after testing the actual lot, thickness and slab structure

Indicative technical properties

Mohs hardness	Approximately 3
Mineral density	Approximately 2.71 g/cm3
Acid sensitivity	High; avoid lemon, vinegar, limescale removers and aggressive products
Scratch resistance	Low to moderate; protected decorative use is recommended
Translucency	To be confirmed for the selected lot and thickness

SPECIFICATION NOTES

Approve the actual lot, finish, thickness, dimensions and vein layout before ordering. Performance ranges are indicative and may vary by quarry, batch and test method. Confirm suitability for exterior, wet-area, kitchen, façade or high-traffic use with the project team.

NON-CONTRACTUAL DOCUMENT - Natural variation is inherent to stone. Values, colour, movement and availability must be confirmed for the selected lot.
